

Cascade Orthopedic Supply, LP and OrtoPed ULC to distribute Lindhe Xtend products in North America

Naperville, IL – February 22, 2021 - Lindhe Xtend Inc. is pleased to announce they have partnered with Cascade Orthopedic Supply, LP, a North American distributor of orthotics and prosthetics. This agreement will facilitate the sale of Lindhe Xtend Inc. products into the United States and Canada.

“The strength of commercial channels, the nation-wide reach of Cascade, and OrtoPed's access to the Canadian market, will allow Lindhe Xtend Inc. to immediately make our products available to O&P facilities across North America,” says Russell Cannon, Director of Sales, North America at Lindhe Xtend Inc.

The first products accessible through distribution will be the Xtend Connect line, a complete range of quick-change adapters. These adapters function similarly to other adapters on the market, but allow patients to safely and securely detach and attach specific parts of their prosthesis.

“Cascade and Ortoped are pleased to bring this unique Swedish innovation to the US market. The product range of the Xtend Connect can truly revolutionize daily activities of the user. Getting dressed, temporarily disconnecting segments for sitting comfort, or simply changing feet for different activities will be easier and quicker for many patients. Lindhe Xtend, founded by triple amputee Christoffer Lindhe, brings a true user perspective and fills a unique need for the market we serve,” says Nina Bondre, CPO, FAAOP, Clinical Educator at Cascade.

Products are available online to order immediately:
